

Where Learning is Fun and Smart

At fun@education, parents have the choice between childcare close to home or close to work.

We offer the ideal location for every family situation. By establishing a network of locations, we aim to gradually reduce travelling times for children and parents. This promotes quality of life and reduces environmental pollution.

We take our educational mission seriously. We invest specifically in the promotion and further development of learning skills from the ages of 2 to 12.

At **fun@education**, we support children in the familiar areas of education. In addition, we develop **new educational programmes to train future skills such as**

Bilingual language support

(German and English)

Nutrition (own cook)

Promoting active movement

Media literacy, etc.

Fairplay

Socio-emotional

competence development

Your advantages:

- Fast availability of space
- Short distances to drop off and pick up
- High pedagogical quality
- Promotion of future competences
- High personnel and projec resources (e.g. through co-operation with employer co-operations)
- After-school support and co-working under construction

We invest in after-school support and learning skills development (CleverLernFit).
